Work History

CELFOCUS (Jan 2018 - Dec 2018)

Position: Test lead

Project/Product: du's ICM (Incentive Compensation Management) cloud migration

Tasks: As part of Celfocus delivery team I was responsible for testing du's ICM cloud migration. This included:

- Leading and managing testing activities (plan, effort estimation, execution and reporting)
- Deploying and maintaining test management stack (AWS-EC2, testlink, mantis)
- Designing test plans, scenarios and procedures
- Compiling test data
- Conducting sanity, system, e2e and regression testing
- Defining and conducting performance tests

- Performing initial debugging procedures by reviewing configuration files, logs, or code pieces
- Conducting bug advocacy

Technologies: SQL, PL/SQL, Shell script, ORACLE Database, Informatica Powercenter, CallidusCloud, Callidus Truecomp, SAP BO, sqldeveloper, AWS-EC2, mantis, testlink, Excel&PowerQuery

Hitachi Consulting (Set 2016 - Dez 2017)

Position: Test Analyst

Project/Product: Building and maintaining Dominos UK ecommerce platform

Tasks: As part of Dominos UK delivery team I was responsible for conducting thorough testing across both front end and back end systems in an AGILE-SCRUM environment

- Designing test plans, scenarios and procedures
- Conducting API, system, e2e and regression testing
- Conducting load and web performance testing
- Performing initial debugging procedures by reviewing configuration files, logs, or code pieces
- Improving applications testability by conducting exploratory testing
- Conducting bug advocacy

Technologies: swagger, postman, jmeter, PAL, Alexa, TFS, MS Test Manager, Jira

Noesis (Dec 2015 - Ago 2016)

Position: Test Analyst

Project/Product: Building and maintaining Energy21 SaaS and API based web applications

Tasks: As part of Energy21 delivery team I was responsible for conducting thorough testing across both front end and back end systems in an AGILE-SCRUM environment

- Designing test plans, scenarios and scripts (manual)
- Conducting system, e2e and regression testing
- Performing initial debugging procedures by reviewing configuration files, logs, or code pieces
- Improving application testability by conducting exploratory testing
- Conducting bug advocacy

Technologies: Outsystems, Oracle Database, CA Agile Central (aka Rally)

Novabase (Ago 2013 - Nov 2015)

Position: Test Analyst

Project/Product: Several but most significantly, Vodafone One Net service

Tasks: As part of Vodafone One Net delivery team I was responsible for conducting thorough testing over Vodafone One Net service

- Designing test plans, scenarios and scripts (both manual and automated)
- Conducting system, e2e and regression testing
- Performing initial debugging procedures by reviewing configuration files, logs, or code pieces
- Conducting bug advocacy
- UI test automation with UFT

Technologies: Web technologies, SQL, HP-ALM, HP-UFT, MS Test Manager, MS Excel, TestRail, SOAP UI, Jmeter, Jira

NOVA IMS (Jul 2012 - Jul 2013)

Position: GIS Analyst

Project/Product: SIGGESC

Tasks: As a GIS Analyst working within the scope of SIGGESC@IMTT my main tasks were:

- Database administration
- Spatial analysis and geoprocessing
- Data modelling
- Designing maps

Technologies: ArcGIS, ArcGIS Server, Microsoft SQL Server

Engineering works (Ago 2008 - Jun 2012)

Position: Transportation engineer

Project/Product: During this period i worked for 2 portuguese engineering companies in more than a dozen of transport infrastructure projects like roadways, highways, parkways and even cycleways.

Tasks: My main tasks and responsibilities were (but not limited to):

- Planning and designing transport infrastructures
- Accessibility and location studies
- Traffic modeling
- Circulation and urbanization plans

Technologies: AutoCAD Civil3D, ArcGIS, PTV Visum

Personal Projects

Project/Product: Design and built personal website

Tasks: Built and deploy cnogola.github.io with Github Pages

- set up a GIT repository
- install Jekyll and dependencies
- Design templating pages with Markdown
- Built site with Jekyll
- Deploy with Github pages

Technologies: Markdown, Jekyll, Github Pages, GIT

<https://cnogola.github.io/>

Project/Product: homeland | News from Portugal - Portuguese official representation at La Biennale di Venezia 2014

Tasks: Create colorful representations of portuguese housing data

- analyse historical housing data for Portugal
- compute and spacialize statistical data
- create colorful representations of housing data

Technologies: PostgreSQL, QGIS, excel

Education

MASTER in CIVIL ENGINEERING - TRANSPORTATION
2001 – 2008

POST GRADUATION in GEOGRAPHIC INFORMATION SYSTEMS & SCIENCE
2011 – 2012

Languages

Portuguese (native)

English (fluent/proficient)

Spanish (basic)

Certificates, courses & qualification

ISTQB Foundation Certificate

Design Thinking

Creating and managing entrepreneurial ventures Master course
